## ABOUT FF TRANSIT BLACK

FF Transit is a highly legible typeface that works well for readers who need quick orientation while en route. Designed to blend aesthetic quality with legibility, it was originally designed by MetaDesign in Berlin for the official use of the Berlin Public Transportation Services (BVG) and Düsseldorf Airport. Based on Frutiger (licensed from Linotype), it is a freshly drawn, narrow version with original italics and many variants made for rigorous applications in a complex signage system. Front and Back are subtle variations which compensate for the visual distortion that appears on illuminated signs which are either backlit or lit from the front. These variants are also useful for the compensation sometimes required by white text on a black background.

## ABOUT METADESIGN

MetaDesign is a design company in Berlin. Although many FontFont designers have worked at MetaDesign at some point, the company itself is listed as the developer of Transit as a lot of people worked on the BVG signing system and related projects.
